DETAILED ACTION

Receipt is acknowledged of the RCE, amendment, and assignment, filed on 10/6/2003), all of which have been entered in the file. Claims 49-51 are pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/6/2003 has been entered.

Allowable Subject Matter

2. Claims 49-51 have been allowed over the prior art of record.

3. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggest: a method for retrieving splice data for a splice from a subset of splices, the method comprising the steps: selecting the subset of splices from a larger set of available splices, the subset including a first splice, transferring a pre-stored plurality of splice indicia associated with the subset of splices, and splice data associated therewith, to a first storage device, in combination with the other claimed limitations as set forth in the claims.

While Pan et al teaches selecting a subset of splice data (qualified records, records that match the record selection criteria are stored in a qualified records data file,

Art Unit: 2876

see figure 9A and column 8 line 60 - column 9 line 2) from a larger set of available splice data (all of the fabrication data files), Pan et al only teaches displaying and printing the qualified records (the subset). Pan et al does not teach transferring the data associated with the subset to a storage device.

Haydon teaches that data may be transferred to a storage device (the scanner 23 may be programmed by a downloading process from a computer into the hand-held scanner, see column 2 lines 40-45). However, Haydon does not teach only transferring a subset of data, associated with bar codes 15, to the storage device.

Therefore, without the benefit of applicant's teachings, there is no motivation for one of ordinary skill in the art at the time of the invention to combine the prior art in a manner so as to create the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
